

## Why school has changed

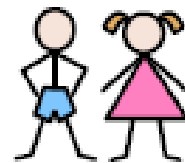

People are talking about Coronavirus because it

is a new illness. It is similar to a flu-bug.

Children and adults are very good at getting better when they get flu.

To help keep everyone healthy, some children and

adults will not be coming into school.

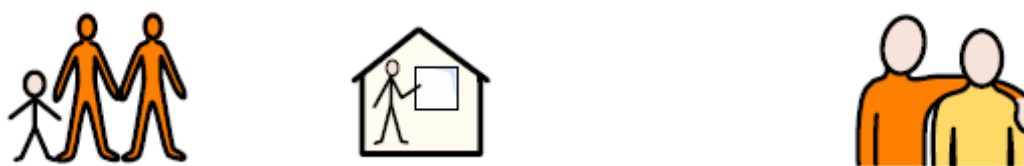

I will still come into school.

School will be different for a while and I might feel

worried.

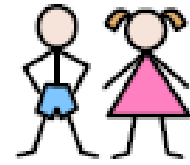

All the adults in the school are there to look after me

and help me if I feel worried.

At school we will do fun activities.

When everyone is healthy again, all the other children

and adults will return to school and we will all be able to

continue with our learning.
